1	Programming Experience	Material is presented clearly	Presentation is at the right speed	Material is at the right level	The instructor explains clearly	Hands on sessions were useful	The course covered what I expected
2	Intermediate	Definitely Agree	Mostly Disagree	Definitely Agree	Definitely Agree	Definitely Agree	Definitely Agree
3	Novice	Mostly Agree	Mostly Agree	Mostly Agree	Definitely Agree	Definitely Agree	Mostly Agree
4	Novice	Mostly Agree	Mostly Disagree	Mostly Agree	Mostly Agree	Definitely Agree	Mostly Agree
5	Novice	Definitely Agree	Definitely Agree	Definitely Agree	Definitely Agree	Definitely Agree	Definitely Agree
6	Novice	Definitely Agree	Definitely Agree	Definitely Agree	Definitely Agree	Definitely Agree	Mostly Agree
7	Novice	Neither Agree or Disagree	Neither Agree or Disagree	Neither Agree or Disagree	Neither Agree or Disagree	Mostly Disagree	Definitely Disagree
8	Novice	Mostly Agree	Mostly Agree	Mostly Agree	Mostly Agree	Mostly Agree	Mostly Agree
9	Intermediate	Definitely Agree	Mostly Agree	Definitely Agree	Definitely Agree	Mostly Agree	Definitely Agree
10	Novice	Mostly Agree	Mostly Disagree	Neither Agree or Disagree	Mostly Agree	Definitely Agree	Mostly Agree
11	Intermediate	Mostly Agree	Mostly Agree	Definitely Agree	Definitely Agree	Mostly Agree	Mostly Agree
12	Intermediate	Definitely Agree	Mostly Agree	Definitely Agree	Definitely Agree	Definitely Agree	Definitely Agree
13	Novice	Mostly Agree	Neither Agree or Disagree	Mostly Agree	Mostly Agree	Definitely Agree	Neither Agree or Disagree
14	Novice	Definitely Agree	Definitely Agree	Definitely Agree	Definitely Agree	Definitely Agree	Definitely Agree
15	None	Definitely Agree	Mostly Agree	Neither Agree or Disagree	Neither Agree or Disagree	Neither Agree or Disagree	Definitely Agree

Q8	Q9	Q10
What was good about the course?	What could be improved?	Any other suggestions
	It would be really useful to have at the end of the slides a list of useful commands for the session. This will be particularly helpful to do the practical parts.	
The pace and clear explanations. The amount of information (even a bit more info could have been better).	I'd like to see more about how to develop an actual python project, how to import libraries, make executables, more details about the libraries... Perhaps a document describing the method to build a project from beginning to end? That would be great.	See above.
Sensible choice of content	It went a bit fast (particularly during the lecturing)	More worked examples
Dr Smith shows expertise in the subject, Clear messages and nice working exercise in session	The room 120 SAF is perhaps not very good for this sort of courses when the college has nice facilities such as ICT training room, Central library 204	
general overview of things you can do on python	more practical problems and solutions demonstrations	
Clear explanations with great examples		
Excellent notes and good examples given for the various different topics. Really appreciate the tip about code academy website which is an excellent learning tool	More time to complete the hands on stuff would have been nice. Also at times it was extremely fast paced and I didn't have a lot of time to think about what was said and ask a question before we'd moved on.	
good mix - not to easy, not to difficult	maybe the lecturer was going through the things a little bit too fast	
Watching the live demonstrations of typing commands into python.	Doing the solutions after we've had a go. If not all then at least the basic ones.	
Clear presentation from an excellent teacher.	The room is not very good for a programming course: lousy view if you're not on the front row, wonky chairs and need to balance my laptop while listening.	A second course that deals with more advanced programming in Python?
Very informative and ideal format (as in theory/taught followed by hands on). Very effective way of learning.
